

EKLUND LOUNGE COLLECTION

DESIGN PERSPECTIVE

Today's unconventional spaces require solutions that are flexible and versatile, yet stylish and welcoming. With modularity that's reconfigurable time after time, Eklund's comprehensive portfolio of lounge, personal nook, rocker, and tables offers all of the components to create comfortable environments for a variety of needs. In addition to Eklund's portfolio depth, its organic shape adds a sense of warmth and comfort.

Eklund lounge is an innovative product that allows facilities to create vignettes and rearrange them as needs change. The optional privacy panels create acoustical and visual privacy as well as a sense of protection, adding to Eklund's practicality and purpose.

“Born from the need for familiar and comfortable spaces that blend between residential and commercial environments, Eklund provides a familiar and comfortable lounge solution with options for privacy and softened acoustics. I was inspired by organic shapes and designed Eklund's sweeping, flowing curves to mimic the privacy and protection one might find in nature.”
