1

Position and level units at desired location. Place a bracket in the track of each joining unit (Fig A). Insert a thumb screw into the front hole of the bracket located in the Stationary joining unit (Fig B).

Figure A

Insert thumb screw into the front hole of the stationary units bracket.

Figure B

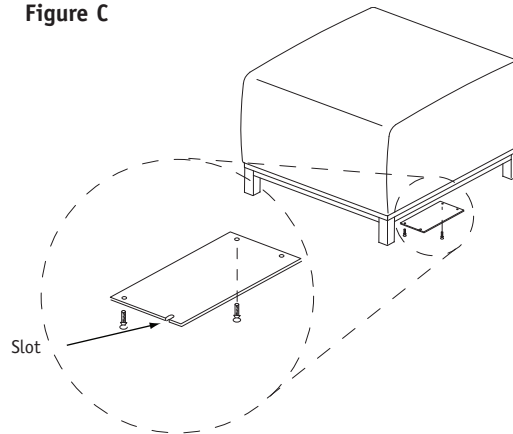

NOTE: Stationary unit could be any unit a table is shown in this example.

2

On the other joining unit attach the small bracket using the thumb screws, to the large bracket. **Note** the position of the slot in the large bracket. The slot should be positioned to slide over the thumb screw of the mating unit (Figure C).

Figure C

3

Align the joining units by sliding the notch of the large bracket over the thumb screw. Insert the remaining thumb screw into the last hole (Figure D). Tighten all thumb screws.

Note: A clamp may be need to pull the units together due to the padding and foam.

Figure D

NOTE could be any units joining this example shows a Bench and Table.

NOTE position of the slot, should be facing out.
