

# A HIGH PERFORMANCE FINISH FOR YOU AND THE ENVIRONMENT.

INTEGRACLEAR® UV FINISH IS THE ULTIMATE BALANCE  
OF CLARITY, DURABILITY, AND SUSTAINABILITY.

This extremely low emitting finish is a water-based, proprietary formulation which provides excellent wood protection to keep your casegoods and tables looking their best.

Curing quickly to a completely inert finish, with superior resistance to heat and chemicals, IntegraClear offers exceptional durability while allowing the natural beauty of the wood to be seen through the finish.

## WHAT IS INTEGRACLEAR?

IntegraClear is National's water-based wood finish cured via ultraviolet (UV) light. The result is a finish that offers exceptional clarity and durability to help products meet or exceed strict indoor air quality requirements which create healthier workplaces and can contribute towards earning LEED® points.

---

## WHY IS INTEGRACLEAR IMPORTANT?

Environmentally-friendly IntegraClear performs for you and the sustainability journey:

- Water-based with virtually no volatile organic compounds (VOCs) to protect respiratory health
- Application by robotic sprayers reduces waste and provides better aesthetic consistency
- Enables National products to meet stringent requirements of the BIFMA Furniture Emission Standard (FES) and gain SCS Indoor Advantage™ Gold and level® certifications which can contribute toward Green Building Standards such as LEED and WELL.
- The use of UV lights versus heated ovens results in significant energy efficiency gains during the curing process
- Enhances the natural beauty of wood by allowing you to see "through" the finish and appreciate the natural characteristics of the wood itself
- No hazing or other impact from liquid spills, hot beverages, or food containers
- Excellent heat, sunlight, and chemical resistance (cleaners and solvents including bleach) for lasting aesthetic appeal
- Resistant to vinyl imprinting from items such as binders, desk pads, and desktop mailboxes
- Immediate curing reduces the risk of damage during handling, shipping, and installation
- Voids in veneer (pitch/gum pockets) are filled for completely smooth surfaces
- Improved resistance to the fine scratches from everyday activities
- Field repairable, similar to conventional finishes
- Standard at no premium
